BRIDGE Magazine  
Eta Kappa Nu Association  
P.O. Box 3535  
Lisle, IL 60532

Dear BRIDGE Editors,

It is with great honor and pleasure that we present this annual summation of the activities and accomplishments of the Mu Chapter of Eta Kappa Nu at the University of California, Berkeley during the 2007-2008 school year. It is our hope that through this report we are able to share the immense pride we have in our work, our chapter, and our representation of Eta Kappa Nu to the community.

While improving and expanding the services Mu Chapter already offers to students, faculty, and the community, this year we set new goals to aspire to. Beginning with hosting the Fall 2007 HKN Student Leadership conference, Mu Chapter pursued a more active role in Eta Kappa Nu at the national level. Meanwhile we worked to improve ourselves from within. Throughout the year we focused on strengthening the bonds between all members of Mu Chapter and worked hard to improve member participation and alumni outreach. Our goal was to not only to make our chapter the organization we all knew it could be, but also to help bring this sense of self to the national organization.

In order to properly describe the various aspects of the previous year, we have divided the report into several categories:

- I) 2007 Student Leadership Conference – Information concerning the national 2007 Eta Kappa Nu leadership conference, hosted by Mu Chapter
- II) Service – Details regarding all activities pertaining to Mu Chapters service to students, the department, and the community as a whole.
- III) Outreach – Description of Mu Chapters continuing work to reach out to other HKN chapters, and other general and engineering student organizations, industry and alumni.
- IV) Social – Everything you ever wanted to know about the fun side of HKN. This section contains information regarding social and sporting events within the member and candidate community.

V) Official Business – Information concerning activities relating to the perpetuation of Mu Chapter. Meetings, elections, and the like can all be found here.

VI) Statistics – The raw numbers of Mu Chapter including dates, participation levels, and the total time spent in both preparation and enjoyment of all events.

The first page of each section provides an excellent summary of the events contained within, while the rest of the section provides a more in-depth look at specific events and their content. Also, the calendar of events provided at the end of the yearbook will provide additional reference to the activities of Mu Chapter.

Through this report we hope that you will understand the effort our members and officers put into our beloved Mu Chapter and how this effort is transferred into giving back to the department, fellow students, and in turn, to the Chapter.

Sincerely,

The Mu Chapter Bridge Committee

Matthew Ekstrand-Abueg

Kyung yul Lim

# HKN Student Leadership

HKN members from all over the country mingle over dinner at the welcome mixer Friday Night.

In Fall 2007, Mu Chapter had the opportunity to host a student leadership conference. On October 26-27, representatives from Arizona State University, California State University, Los Angeles, New Mexico State University, the University of Texas, Arlington, and the University of Washington, attended “Making a Difference: Leadership Through Innovation” at the University of California, Berkeley. A welcome mixer the evening before the conference gave everyone the chance to get to know each other over food and conversation.

The next morning started with a presentation by Jorn Lygseggen, founder, and CEO of Meltwater Group. He provided insights into growing global companies and leadership, particularly encouraging ambition, exceeding goals, and taking responsibility for one’s actions. He also extended an offer for a fellowship to teach in Ghana. Next, Dr. Steven Goodnick, HKN board member and now Vice President, spoke about the integration between fields, particularly bio, nanoscale, information, environment, and energy, in cutting-edge research and technology.

Attendees were treated to several interesting presentations over the course of the conference, including the one featured here about leadership and responsibility by Meltwater CEO Jorn Lygseggen.

# Conference

Following the presentations, Mu Chapter shared one of its most popular fun events: the Photo Scavenger Hunt. HKNers from different chapters teamed up to compete in a scramble across campus to take the best photos of the most clues, ranging from Berkeley landmarks to movie re-enactments. A delicious lunch was waiting for the hungry competitors when they returned from the hunt.

Photo scavenger hunt winner, Team Bevo, stops to look for the location of the next

Mu Chapter Bridge officer Jerry entertains guests by juggling more than 15 balloons!

Afterwards, attendees got the opportunity to take a special tour of Lawrence Berkeley National Laboratory, where incredible research has been and continues to be conducted.

A panel of Mu Chapter Industrial Relations officers and representatives from Meltwater held a discussion about how HKN chapters can interact with industry effectively to benefit both parties. Mu and Gamma Chi then led a discussion

on chapter management and development including topics like maintaining member involvement, and managing efficient external communication. Smaller chapters got a chance to share ideas about how to keep chapters active. The evening keynote speaker, Dr. Chenming Hu, gave an interesting presentation about the technical advances in transistors and shared his expertise in both academia and industry. Following was a closing banquet in the Lipman Room at the top floor of Barrows Hall, with a magnificent night view of the San Francisco Bay.

Conference visitors enjoy delicious mediterranean cuisine during the closing banquet dinner.

# Services

Perhaps what Mu Chapter takes the most pride in is our long standing tradition of service to both our department and the community as a whole. We feel giving back to the organizations that have given so much to us is possibly the most important function our chapter provides. This year we have expanded this aspect of our activities, and have chronicled our work here.

In service of the Berkeley EECS Department, we continued our program of administering course surveys to all Electrical Engineering and Computer Science courses, improved our tutoring program, and expanded our online exam database. In terms of community involvement, we branched out to helping children become interested in science and engineering, while also running more traditional community service activities such as environmental cleanup and charity fundraising.

# Services

## ATOM SCIENCE CLUB

In the Spring, Mu Chapter, in conjunction with IEEE, reached out to local elementary school children, inviting approximately 50 students from the ATOM (Adventures Through Open Minds) Science Club to join us for a day of interactive learning. While here, ATOM club members and their families visited several officer- and candidate-led workshops, each emphasizing different E&M concepts such as static electricity and circuit design. During the hands-on workshop, Mu Chapter volunteers worked with groups of 2-3 children, allowing them to get experience with breadboards, LEDs, and resistors in small labs designed to demonstrate series and parallel configurations.

Mu Chapter member Peter shows off his robot car from EE192 Mechatronic Design Lab.

Mu Chapter candidate Noah explains basic EE concepts to the students from the ATOM science club.

Industrial Relations officer Judy gives children an intuitive sense of how LEDs work.

The hands-on involvement and enthusiasm of the club created an experience as rewarding for Mu Chapter as it was for the students.

## RENEW THE ZOO

Computing Services officer Brian carries tools between job sites at the zoo.

This spring, Mu Chapter continued its participation in the “Renew the Zoo” community service event at the San Francisco Zoo. We started off the day with a vigorous dance warm-up and then headed off to a corner of the park to start working. Members, officers, and candidates donned gloves, shovels, rakes, and hoes to clear out overgrowth and beautify the perimeter of the zoo. It was great to see so many people working hard to rejuvenate a verdant public space. Our volunteers were commended on a job well done; each volunteer got a complimentary day-pass for entrance into the zoo, ride ticket, and drink. Afterwards, we stayed to see the animals and take a ride on the exhilarating Lil’ Puffer Train.

## EARTH DAY CREEK CLEAN UP

Mu Chapter officers and candidates pull out harmful weeds to help native plants grow.

Our volunteers, through diligent hours of work, helped preserve the native plant species and removed the cement bed on the bottom of the creek. At the end of the day, it was rewarding to see the creek back to its magnificent beauty.

To keep the natural environment in near-by Oakland clean and healthy, Mu Chapter members and candidates volunteered to help clean the Escher Creek Bed.

Mu Chapter candidate Guan Xi Chen shows off the non-native plant he has just removed.

# Services

## STAFF APPRECIATION BAKEOFF

Mu Chapter candidates and officers prepare cakes and cupcakes with electrical engineering icing diagrams.

Each semester Mu Chapter candidates and officers showcase their culinary prowess for the benefit of the amazing UC Berkeley EECS departmental staff. This year, continuing this great tradition, our dedicated Department Relations officers delivered baked goods to the staff. These events give officers and candidates a chance to interact in a more creative and informal setting, while providing a great service to the department that gives so much to our chapter.

Vice President Nir explains some of the engineering concepts to a group of students.

## ENGINEERING FOR KIDS DAY

Mu Chapter's Student Relations Committee organized their First Annual Engineering for Kids Day in the spring. We partnered up with a host of other engineering societies and contacted local elementary schools to invite their students to Berkeley for a day to see what engineering is all about. We put on

activities ranging from building bottle rockets to creating electrical circuits to powering model cars with solar panels. The event was loved by parents and children alike, and we are looking forward to doing it again next year.

Children visiting Berkeley intently watch our Van de Graff Generator in action.

## MAKING STRIDES AGAINST BREAST CANCER

To help raise awareness of Breast Cancer, Mu Chapter volunteers helped with the annual “Making Strides Against Breast Cancer” fundraising event of the American Cancer Society. Mu Chapter came out to Golden Gate Park in San Francisco, guiding and cheering participants through checkpoints, gathering trash, and helping clean up after the event. Despite the cold October weather, everyone felt warm in their hearts having helped a good cause.

Officers, candidates, and members cheer on the participants as they walk past a checkpoint.

Mu Chapter candidate Matt rushes towards the pies to regain strength to carry on with his project.

provide these surprise visits throughout the semester for the most heavily loaded courses of Berkeley’s EECS major, partnering with a variety of larger high tech firms like Google and Microsoft. Stacks of pies or boxes of donuts from our Student Relations committee never fail to raise the spirits of the tired and weary students plugging away in the labs, and remind them to eat something!

## STUDENT PIE RUNS

HKN and Microsoft conducted a sponsored pie run in which our officers brought pies from nearby restaurant Nation’s for CS162 (Berkeley’s Operating Systems and System Programming course) students working on their project late at night. We

Mu Chapter officers Nir and Keaton take a break from their CS162 project to enjoy the treat.

# Services

## PEER ADVISING

Continuing a recent tradition, Mu Chapter held peer advising sessions to assist students in their choices of classes, research, and internships. The sessions, sponsored by the Department of Engineering, are especially intended to

Mu Chapter Officer Mehd Abderezai talks with EECS students about choosing classes and professors.

provide a student's perspective on which classes are important, which professors are helpful, and what courses are important for jobs and graduate school.

Mu Chapter members discuss their research experience to benefit members of the EECS student body.

All of our officers dedicate 2 to 3 hours per week to enable us to provide free, one-on-one drop-in tutoring in EECS and general technical courses. All students are welcome in either of our two offices Monday-Friday, 11am-5pm, to find help with new concepts from class or guidance on homework, projects, and exam preparation.

## TUTORING

Officers lead a review session for EE20N, a class on basic Signals and Systems concepts.

## EXAM FILES

During each semester, copies of nearly all the exams from EECS courses are collected and converted to PDF format to be posted to our website for all students to review with. As a result of our collective effort, we are able to offer a large archive of problems and solutions for students to utilize while studying for examinations.

Ingrid, Mu Chapter officer, helps organize and clean up exam files for scanning and adding to the database.

As the end of the semester nears, Mu Chapter candidates administer EECS departmental course surveys to all classes. The surveys, which allow student evaluation of professors, teaching assistants, course content, and overall experience, are highly valued for both future students planning their class lists and the EECS department as a whole for assessment of faculty and courses.

Officer Jared prepares an exam to add to our extensive online exam database.

## COURSE SURVEYS

EECS students fill out course surveys administered by HKN Mu Chapter's candidates.

# Social

Once in a while Mu Chapter members need to take a break from studies. Social events provide opportunities to relax and have fun, as well as the chance for members to form new friendships and strengthen old ones.

Mu Chapter officers exercise their creativity in planning enjoyable and worthwhile experiences to engage all members. A combination of improved old favorites, such as photo scavenger hunt, and new additions, such as rock climbing, made for a fun semester for everyone.

Whether it's an ice cream social to getting people to mingle with a common love for frozen treats or a game of capture-the-flag that brings people together through teamwork and competition, a good social event gets candidates and members to meet people and feel welcomed and helps building a stronger, more cohesive chapter.

# Social

## MEMBER POTLUCK

Members and Officers together socialize as they check out the variety of foods the officers made.

Mu Chapter Officers baked, boiled, sautéed, and fried to bring together our Members at our semi-annual Members' Potlucks. Sharing pastas, brownies, cornbread, and soup also gives us a chance to see old friends, make sure members are aware of everything the chapter is doing this semester, and welcome everyone back to school.

## FACTORY TOUR

Sweet chocolate brings sweet smiles! Mu Chapter takes a picture in front of the Scharffenberger chocolate factory.

Each semester Mu Chapter takes members and candidates to a local candy factory to indulge everyone's sweet tooth, and have an afternoon of fun. This Fall the factory of choice was Jelly Belly, and in the Spring it was Scharffenberger. At each factory, members and candidates experienced the inner workings of the candy giants, from mixing

to wrapping to information on the manufacturing process. At the end of the tours, all were treated with free samples of the sweet confections.

Our vice president Lahini enjoys taking a picture with the cute Jelly Belly mascot.

## PHOTO SCAVENGER HUNT

“Double your team!” Vice President Nir’s group solves the clue by cleverly utilizing a mirror.

After running around campus taking crazy pictures, Mu Chapter members get to look forward to a delicious BBQ. While enjoying the tasty burgers, the groups are judged by the correctness, creativity, and humor of their photos and must defend against derisive misinterpretations of their clue-inspired artwork. The winning group receives prizes as well as bragging rights until the next Photo Scavenger Hunt.

One of the biggest Mu Chapter social events, the semi-annual photo scavenger hunt event never fails to encourage teamwork and bonding between members and candidates. Participants are divided up into several groups that scatter around campus solving clues and searching the University. Teams must take a picture of the object with every one of their group members in it.

Team Postal Workers find the answer to a clue in the Valley Life and Science Building of Berkeley.

## ICE CREAM SOCIAL

At their first social event, Mu Chapter candidates meet over a tasty gelato. This event is designed as a way to make candidates feel more comfortable with each other by providing a chance to do some fun activities and earn candidate challenges. It is also a good opportunity for them to meet the officers in a casual setting over a yummy treat.

Candidates enjoy talking about their interests. Our Computing Services Officer Jared, seems quite camera conscious.

# Social

## ROCK CLIMBING

This Spring, Mu Chapter began a tradition that let members show that they can scale more than just a vector -- indoor rock climbing. Candidates and officers took to the walls at the local Iron Works Gym, where more experienced chapter members helped beginners work out, while staying safe. Members both climbed the walls and spotted climbers from the ground, helping to build teamwork and communication.

The evening came to a close with a challenge

The Mu Chapter officers, members as well as candidates all take a picture in the Iron Works Gym after a great workout.

Computing Services officer Ryan shows off the Rubik's cube he had just solved while hanging onto the top.

## ICE SKATING

The ice welcomed candidates and officers tearing it up, or at least trying not to fall, at the nearby Oakland Ice Center. Among those skating and clinging to the walls were lines of HKNCers showing off their dance skills.

Mu Chapter Candidate Suraj shows off his dance skills in front of a crowd on ice.

# BOWLING

The late night bowling trip was a great way for HKNers to escape the stress of midterms and focus their energy on throwing strikes and having fun. The comfortable atmosphere and mix of candidates, members, and officers on each lane, ensured that everybody made new friends.

Teams cheer for their bowlers whether they are returning from a successful bowl or a gutter ball.

Our Activities officer Wayne celebrates as Bridge officer Arpad comes back from a strike.

The final scores were generally low, but companionship and good times ran high. Afterwards, sleepy members prolonged the night a little further with a friendly invasion of Nation's Giant Hamburgers.

# MINI-GOLFING

A Mu Chapter member attempts a difficult putt through the narrow entrance of a pagoda.

Mu Chapter enjoyed a calm Sunday afternoon on the mini-golf course. We battled through windmills, loops, pagodas, and sinkholes to show off our putting skills or lack thereof. Whacking away at colored balls helped bring candidates and officers together at a less-strenuous sporting event and gave a break from the pressures of midterms.

Towards the center of the volcano! Will you be too short or too far? Mu Chapter members watch as another tries the challenge.

# Social

This Spring Mu Chapter began a new tradition of allowing candidates to vent their frustration on officers by shooting them with small projectiles filled with paint. Some might call this violence, but we prefer to call it HKN Paintball. Not only did this event allow members, officers, and candidates to relax and vent steam, but it also helped build teamwork and organizational skills.

## PAINTBALL

Member Norman and officers Jerry and Min ready the gear for battle.

Camo-clad HKNers blend in with their surroundings.

## CAPTURE THE FLAG

Continuing the tradition of Capture the Flag matches with Tau Beta Pi, Mu Chapter squared off against the Engineering Honors Society once again this year with a friendly game of CTF. Members from both societies met at night on campus and had a successful competitive and social event. In the end Mu Chapter persevered and won 1-0, breaking the 1-1 tie in last year's match.

Officer Min exhausted from his studies, seems to have mistaken a stop-sign for a flag.

# Outreach

Outreach is all about strengthening connections with old friends while branching out to make new ones. This year's events were designed to further this purpose and even more successful than ever.

With Infosessions and Career Fairs aplenty, Mu Chapter continued building relations with industry while providing all of UC Berkeley with ways to find work experience and careers after college. Our second Alumni Broomball had an unprecedented turnout, and combined with our Alumni Appreciation Dinners, these events maintain close ties with our members after they leave college. Mu Chapter's Student Relations Committee strengthened our connections with other engineering societies and groups on campus with joint events such as Engineering Sports Night, Broomball, and Ultimate Frisbee.

# Outreach

## ULTIMATE FRISBEE

Frisbee players warm up by tossing around the disk before the actual match.

Ultimate Frisbee was the game of choice for this hot summer afternoon study break. Mu Chapter and Berkeley's Tau Beta Pi came together, mixed up the teams, and then started an action-packed small-field game. Such events strengthen ties between the two groups, allowing for better cooperation in other activities like Engineering for Kids Day.

Engineering students stretch before an action-packed game of dodgeball.

## ENGINEERING SPORTS NIGHT

Hundreds of engineering students turned out for Engineering Sports Night--both in the Fall and the Spring--put on by Mu Chapter in conjunction with Tau Beta Pi. Everyone spent hours playing football, soccer, Ultimate Frisbee, and dodge ball.

We provided snacks, fruit, water, and sports drinks to the competitors. The event was held before the first candidate meeting as a good way to promote awareness of HKN, while encouraging healthy exercise.

Competitors take a refreshing break after a hard night's play.

# BROOMBALL

Players battle for the ball with both their feet and sticks alike.

Each semester Mu Chapter reaches out not only to its own alumni, but also other engineering societies in what are some of the most exciting events of the semester: Broomball!

In one of the larger events Mu Chapter hosts, alumni and candidates team up against current officers and members in a legendary battle of wits and high speed ice-running skills. The

long standing alumni-candidate Broomball dynasty was upset this Fall when the members and officers pulled off a huge upset. In the Spring candidates and alumni battled back and regained the Broomball crown.

Mu Chapter takes its wild picture after the game.

## ALUMNI APPRECIATION DINNER

Twice a year, Mu Chapter hosts the Alumni Appreciation Dinner as one of several events meant to keep in touch with past members. Everyone enjoys meeting for a family style dinner with past and present acquaintances. Alumni turnout for these events is always high.

Alumni Sahand enjoys his food and a free balloon at Chevy's in Emeryville.

# Outreach

## INFOSESSIONS

In order to reach out to the EECS student body here at UC Berkeley, as well as local employers, each semester Mu Chapter arranges for numerous companies to come to our campus and hold infosessions. These events allow students to make industry contacts, while obtaining a better understanding of what companies are looking for and learning what various compa-

Amazon.com presents the cutting-edge search methods in their A9 system.

EECS students, including Mu Chapter officers pictured here, listen to a presentation by Qualcomm.

nies have to offer. This past year we hosted not only such industry staples as Qualcomm, Cisco, Yahoo! and Amazon, but also smaller local companies such as InterceI.

A company representative gives a talk about the relationship between people and large-scale computing.

# Official Business

Amidst all the exciting events Mu Chapter holds, the more “serious events” are not forgotten. Officers gather each week to discuss the past and present of the Mu Chapter in the officer meetings. These discussions are announced in the general meetings, which keep candidates, members, and officers up-to-date with what has been happening in the chapter, while letting them make new connections around a nice dinner.

Also, to welcome candidates and discuss the membership process as clearly as possible, a candidate meeting and conversation is held early in the semester to guide them towards their initiation and the banquet afterwards. At the end of every year, the Mu Chapter Bridge Committee presents a slide-show containing entertaining and hilarious pictures and videos recalling the good times of the past semester.

# Official Business

## RETREAT

The first weekend of each semester HKN officers, past and present, travel to a remote location for the bi-annual Mu Chapter officer retreat. This retreat is designed to be both a fun diversion from the coming semester, as well as

Officers come together for a photoshoot midway through their arduous hiking journey.

Mu Chapter officers display their happiness and ferocity atop their masterpiece, the Mighty HKN Snowman-crushing snowball.

a team building exercise that allows old and new officers to come together, exchange information and ideas, and learn from one another while strengthening friendships.

Events are planned for the entire weekend, including board and console games, “Mafia”, and more. In the spring, snow related events such as snow ball fights occur, and in the Fall

officers gather around the television to cheer on the Cal football team. Officers emerge from the weekend with a better sense of Mu Chapter, as well as a sense of camaraderie and HKN spirit that fuels the coming semester.

Ex-President Sameer proclaims victory in a game of Brawl.

# MEETINGS

Throughout the semester Mu Chapter has various official officer and candidate meetings designed to not just address administrative matters, but also to strengthen social bonds and have a good time.

Each week all Mu officers gather together to discuss the coming and past week's events and coordinate between the various branches. Mu Chapter also has three general meetings each semester. Here, officers, candidates, and members get together and discuss all things

Candidates sing and dance the Can-Can at a General Meeting.

Mu Chapter grabs food at the end of the meeting.

HKN. During each meeting an invited EECS professor also gives a presentation on anything from research into artificial intelligence, to engineering life lessons, and even the story of Bill Gates' only published research paper.

## ELECTIONS AND MIDNIGHT MEETING

Each semester, members get together for 6 to 8 hours the day after banquet to elect new officers to all positions for the next semester. We have nominations, candidate speeches, discussions, and votes for each position. Nominees talk about what they have to offer, their thoughts on the position, and what needs improvement. Midnight meeting occurs the night of elections, where new and old officers come together to introduce themselves and talk about what went well in the previous semester and what can be improved upon in the next.

New and old officers gather to eat and talk about all things HKN.

# Official Business

## INITIATION AND BANQUET

New member Judy Hoffman and officer Darren Lo pose at banquet.

As a capstone to each candidate's semester, in the final week of courses we hold HKN initiation. During initiation the traditions of HKN are instilled upon new members, and a history of the organization and its ideals are presented. Members receive a certificate commemorating their achievement. After photos and congratulations, officers and members travel to our semesterly banquet.

Old and new members gather for a photo after initiation ceremonies.

Mu Chapter members attempt to hold up new member Niels Joubert after Initiation.

At Banquet, past and present members and officers gather to celebrate another amazing year of Mu Chapter events at a semi-formal event. During the dinner the Bridge committee presents a slideshow of pictures and videos recapping the semester, and various humorous officer awards are given. During this event outstanding new members are also recognized. In the Fall, this event was held at Capurro's on Fisherman's Wharf, and in the Spring at the Argonaut Hotel.

Everyone enjoys a lovely meal in San Francisco at Banquet.
